

Architecture Introduction

Mark Elkington

13 - 14 December 1993

ECS Architecture Activity

objectives

- more closely reflect science needs
- better satisfy evolvability criteria
- be able to respond to policy evolution

process (has included ...)

- meetings with key users
- trade studies, studies of other systems
- GCDIS/userDIS analysis

current status

- new conceptual architecture vision
- extending into segment level analysis

what's next

- validation with science community & user/data modelling
- re-baseline architecture

Architecture Presentation Structure

GCDIS/userDIS - Background and Issues

evolving ECS into GCDIS/userDIS supplier
